Certifications

Cloudera Certified Administrator for
Apache Hadoop (CCA-H)

Sudhakar Koduri

Senior Cloud Data Platform Engineer | AWS Big Data Engineer | AI/
ML Infrastructure | EMR, S3, Cloudera, Hadoop, Kafka, Hive, Spark,
Linux, Terraform

Atlanta Metropolitan Area

Summary

I am a Senior Cloud Data Platform Engineer with 12+ years of experience across AWS, Big Data platforms, Hadoop administration, Cloudera, Hortonworks, Linux infrastructure, enterprise production support, platform security, data migration and cloud modernization. My background is focused on building, securing, operating and modernizing large-scale data platforms that support analytics, machine learning and enterprise AI workloads. I have hands-on experience with HDFS, YARN, Hive, HBase, Kafka, Sqoop, Flume, Oozie, Impala, Zookeeper, NiFi, Ranger, Knox, Sentry, Kerberos, LDAP, Ambari, Cloudera Manager, Linux, Shell scripting, Python and SQL. I have also worked with AWS services including EC2, EMR, S3, Lambda, VPC, IAM, Route 53, CloudFormation and security groups. My experience includes on-prem Cloudera to AWS S3 migration, EMR automation, Hadoop service deployment automation, TLS/SSL security configuration, production upgrades, capacity planning, monitoring, incident resolution and platform reliability. I am now focused on modern cloud data and AI platform engineering, including lakehouse architecture, AWS analytics, data pipelines, MLOps, GenAI platform infrastructure, AI-ready data platforms and secure enterprise data operations. Certifications: AWS Certified Solutions Architect – Associate, Cloudera Certified Administrator for Apache Hadoop. Core strengths: AWS Cloud, EMR, S3, EC2, IAM, Hadoop, Cloudera, Hortonworks, HDFS, YARN, Hive, Kafka, Sqoop, Flume, Oozie, Impala, NiFi, Ranger, Kerberos, LDAP, Linux, Python, Shell Scripting, SQL, Production Support, Monitoring, Platform Security, Data Migration, Cluster Upgrades, Performance Tuning and Cloud Data Platform Operations. Target roles: Senior Cloud Data Engineer, AWS Data Engineer, Big Data Platform Engineer, Cloud Data Platform Engineer, AI/ML Infrastructure Engineer, MLOps Platform Engineer, Data Infrastructure Engineer, Production Data Platform Engineer.

Experience

Ally

7 years 3 months

Principal AI Cloud Engineer

July 2025 - Present (1 year)

Charlotte, NC

Leading cloud data platform engineering and AI-ready infrastructure initiatives for Ally's enterprise banking technology environment, with a focus on AWS, big data modernization, production reliability, platform security, automation and scalable data operations.

Responsible for supporting and modernizing enterprise data platforms across AWS, EMR, S3, EC2, IAM, Cloudera, Hadoop, HDFS, YARN, Hive, HBase, a environments into cloud-aligned data platforms that can support analytics, machine learning, regulatory reporting, risk use cases and future enterprise AI workloads.

Partnering with data engineering, infrastructure, security, application and analytics teams to improve platform availability, access control, performance, scalability, observability and operational excellence.

Supporting AI/ML infrastructure readiness by strengthening secure data access, scalable storage, distributed compute, metadata consistency, monitoring, incident response, workload performance and production support processes.

Leading platform operations including cluster health monitoring, service validation, node commissioning and decommissioning, capacity planning, configuration reviews, job failure analysis, log troubleshooting, security validation, upgrade readiness and post-release support.

Contributing to AWS cloud data platform patterns involving EMR, S3, IAM, VPC, EC2, Lambda, CloudFormation, automation, data migration and secure enterprise data operations.

Helping teams move toward modern AI-ready architecture by improving the reliability of the data foundation required for analytics, machine learning, lakehouse platforms, MLOps and GenAI workloads.

Core strengths include AWS cloud infrastructure, big data operations, Hadoop ecosystem administration, cloud migration, Linux administration, platform security, production incident management, performance tuning, automation, monitoring and enterprise data platform reliability.

Senior AI Cloud Engineer

July 2022 - June 2025 (3 years)

Charlotte, NC

Supported enterprise cloud data platform operations for Ally's banking data ecosystem across Cloudera Hadoop, HDFS, YARN, Hive, HBase, Sqoop, Oozie, Impala, Sentry, Linux and AWS-aligned big data environments.

Led production platform support activities including Cloudera upgrades, cluster monitoring, service health checks, configuration validation, node commissioning and decommissioning, NameNode recovery, capacity planning, incident troubleshooting and post-upgrade validation.

Partnered with data engineering, infrastructure, security, analytics and application teams to improve platform reliability, performance, access control, operational stability and availability for large-scale banking data workloads.

Supported secure data platform operations using Kerberos, Sentry/Ranger-style authorization, Linux access controls, TLS/SSL patterns, monitoring tools and production support processes.

Worked on cloud modernization and AI-ready data platform initiatives involving AWS, EMR, S3, big data processing, data migration, automation and scalable infrastructure for analytics, machine learning and enterprise AI workloads.

Improved operational readiness by troubleshooting Hadoop service failures, analyzing logs, supporting job failures, validating service performance, documenting fixes and providing on-call production support.

Core technologies: AWS, EMR, S3, EC2, IAM, Cloudera, Hadoop, HDFS, YARN, Hive, HBase, Kafka, Sqoop, Oozie, Impala, Sentry, Ranger, Kerberos, Linux, Shell Scripting, Python, SQL, Monitoring, Incident Management, Data Migration, Performance Tuning, Cloud Data Platforms and Big Data Operations.

Target direction: Senior Cloud Data Platform Engineer, AWS Data Engineer, Big Data Platform Engineer, AI/ML Infrastructure Engineer and Production Data Platform Engineer.

Cloud Engineer

April 2019 - June 2022 (3 years 3 months)

Charlotte, NC

I am a Senior Cloud Data Platform Engineer with 12+ years of experience across AWS, Big Data platforms, Hadoop administration, Cloudera, Hortonworks, Linux infrastructure, enterprise production support, platform security, data migration and cloud modernization.

My background is focused on building, securing, operating and modernizing large-scale data platforms that support analytics, machine learning and enterprise AI workloads. I have hands-on experience with HDFS, YARN, Hive, HBase, Kafka, Sqoop, Flume, Oozie, Impala, Zookeeper, NiFi, Ranger, Knox,

Sentry, Kerberos, LDAP, Ambari, Cloudera Manager, Linux, Shell scripting, Python and SQL.

I have also worked with AWS services including EC2, EMR, S3, Lambda, VPC, IAM, Route 53, CloudFormation and security groups. My experience includes on-prem Cloudera to AWS S3 migration, EMR automation, Hadoop service deployment automation, TLS/SSL security configuration, production upgrades, capacity planning, monitoring, incident resolution and platform reliability.

I am now focused on modern cloud data and AI platform engineering, including lakehouse architecture, AWS analytics, data pipelines, MLOps, GenAI platform infrastructure, AI-ready data platforms and secure enterprise data operations.

Certifications:

AWS Certified Solutions Architect – Associate

Cloudera Certified Administrator for Apache Hadoop

Core strengths:

AWS Cloud, EMR, S3, EC2, IAM, Hadoop, Cloudera, Hortonworks, HDFS, YARN, Hive, Kafka, Sqoop, Flume, Oozie, Impala, NiFi, Ranger, Kerberos, LDAP, Linux, Python, Shell Scripting, SQL, Production Support, Monitoring, Platform Security, Data Migration, Cluster Upgrades, Performance Tuning and Cloud Data Platform Operations.

Target roles:

Senior Cloud Data Engineer

AWS Data Engineer

Big Data Platform Engineer

Cloud Data Platform Engineer

AI/ML Infrastructure Engineer

MLOps Platform Engineer

Data Infrastructure Engineer

Production Data Platform Engineer

Philips Wellcentive

Cloud Engineer

June 2018 - April 2019 (11 months)

Atlanta Metropolitan Area

Supported cloud-aligned big data platform operations for Philips Wellcentive across Cloudera Hadoop, HDFS, YARN, Hive, HBase, Sqoop, Oozie, Impala, Linux, Kerberos and enterprise data security environments.

Worked on installation, configuration, monitoring, security implementation and operational support for Cloudera Enterprise Hadoop clusters supporting healthcare data workloads.

Implemented authentication and authorization controls using Kerberos and enterprise security patterns to protect sensitive healthcare and HIPAA-regulated data.

Supported data encryption, access control, cluster hardening, service validation, node management, capacity planning, configuration checks and production troubleshooting across Hadoop environments.

Partnered with big data architecture, systems engineering, security and data analytics teams to deploy new Hadoop environments, expand existing clusters and improve platform reliability.

Served as a technical support point for data encryption and platform security coordination with Cloudera vendor teams.

Troubleshoot Hadoop service issues, reviewed logs, supported cluster health checks, assisted with performance tuning and helped resolve production incidents impacting data engineering and analytics workloads.

Contributed to cloud data platform modernization by strengthening the foundation required for scalable analytics, secure data processing, machine learning workloads and future AI-ready enterprise data platforms.

Core technologies: Cloudera, Hadoop, HDFS, YARN, Hive, HBase, Sqoop, Oozie, Impala, Kerberos, Linux, Shell Scripting, SQL, Data Encryption, HIPAA Data Security, Cluster Monitoring, Capacity Planning, Production Support, Big Data Operations and Cloud Data Platform Engineering.

Education

Stratford University

Master's Degree, Computer Software Engineering · (2014)

Kakatiya University

Bachelor's Degree, Bachelor of Computer Science · (1997)
